

## MEDFORM <br> NP 3010 E

## Description

MEDFORM NP 3010 E is a transparent, one side heat sealable, nontreated multilayer cast film.

It is specially designed to as a web on thermoforming machines for the packaging of medical products to seal to suitable substrates to form an integral pack. It is suitable for sterilisation by ethylene oxide.

Heat sealable layer is modified to have a sealing capability to special coated papers without any fiber pick-up when the pack is opened.

## Properties

- Excellent thermoforming capability
- Good mechanical behaviour after thermoforming
- Excellent optics after thermoforming
- Easy peel sealing property to special papers
- No fiber pick-up from paper
- Excellent resistance to chemicals, greases and oils
