

# **SUPWHITE** 2211 / 2212

## **Description**

SUPWHITE 2211 and 2212 are white pigmented, coextruded, biaxially oriented polypropylene (BOPP) film. Both sides heat sealable. One or both sides treated.

White colored heat sealable film for general packaging applications. It can be used on HFFS and VFFS packaging machines. It can be used as single ply surface print and lamination substrate to itself and other films.

White color also saves white base color print.

# **Properties**

- · White appearance
- Outstanding opacity and gloss
- · Broad seal range and hot tack
- · Good hot slip
- · Excellent resistance to chemicals, greases and oil
- · Excellent ink and coating adhesion

## **Technical Features**

### "Product Identification (Decision 97/129/EC): PP5"

#### Regulatory Status

Our product complies with the applicable EC legislation on packaging involving direct contact with foods except metallized films. Full details are given on the Regulatory Compliance Certificate and can be found on our web site.

The information contained in this data sheet is true and accurate according to current state of our knowledge and intented to give general information on our products and their applications. Above values are to be considered as guidelines and not as product specifications. Since the actual conditions of use are beyond our control, users are advised to make their own tests at their specific conditions of laboratory and/or actual use. We suggest our customers to determine final suitability for their specific end uses.

Also be advised that information on this data sheet shall not be construed as an inducement or recommendation to use any process or to manufacture or use any product in conflict with existing, pending or future patents.

For related spec sheet with tolerance values, please contact our sales departments

STANDARD ROLL DIMENSIONS
